

... it's a new model for understanding!

“Computational Thinking”

- Scattered early interest ...
- Seymour Papert (constructionism, LOGO):
- 1997 “Computational Thinking” citation
- Related mentions earlier, e.g. 1980:
 - “The factor that will influence the development of children is the diffusion into their culture of computational concepts.”

2006: Jeannette Wing CACM article

Viewpoint | Jeannette M. Wing

Computational Thinking

It represents a universally applicable attitude and skill set everyone, not just computer scientists, would be eager to learn and use.

Computational thinking builds on the power and limits of computing processes, whether they are executed by a human or by a machine. Computational thinking is a problem-solving process. Stating the difficulty of a problem accounts for the underlying power of the machine—the computing device that will run the solution. We must consider the machine's instruction set, its resource constraints, and its operating environment. In solving a problem efficiently, we might further

A magazine where the digital world meets the real world.

What is Computational Thinking?
One of the exciting things about learning Computing and problem solving is...

COMPUTATIONAL THINKING

CT Presentation Tutorial

Google

Exploring Computational Thinking

What is CT?

Computational thinking (CT) involves a set of problem-solving skills and techniques that software engineers use to write programs that underlie the computer applications you use such as search, email, games. However, computational thinking is even more...

Carnegie Mellon

CSAIL

Algorithmic Education - March 2015 - Steve Ward 7

Invasion of Computational Thinking

Economics

- Simulation. Game theory.
- Pricing models. Programmed trading. Flash crash. Bitcoin.

$$C = SN(d_1) - N(d_2)Ke^{-rt}$$

Biology

- Genome as code; interpretation.
- Natural selection; evolution
- Models of intelligence

Arts

- Abstraction: Science of Art
- Profiling models: programming “taste”?

PANDORA ONE NETFLIX

Epagogix

experience • knowledge • prediction

Great Thinkers using CT...

$$\nabla \cdot \mathbf{E} = \frac{\rho}{\epsilon_0}$$

$$\nabla \cdot \mathbf{B} = 0$$

$$\nabla \times \mathbf{E} = -\frac{\partial \mathbf{B}}{\partial t}$$

$$\nabla \times \mathbf{B} = \mu_0 \mathbf{J} + \mu_0 \epsilon_0 \frac{\partial \mathbf{E}}{\partial t}$$

James C. Maxwell's
Code Review

Maxwell's correction to Ampere's Law:

Reverse-engineering the universe!

- Changing magnetic field => electric field;
- Why not the other way around?
 - Cycle: Changing E => changing B => changing E => ...
 - Self-perpetuating "electromagnetic wave"?
 - Propagates at ... speed of light??? Eureka!

```
// exact speed of light,
// m/sec:
const C=299792458;
```

Einstein's insights ...

- How can C be a constant?
 - depend on frame of reference?
 - No! Would require frame-dependent code!
- Does God play dice with the universe?
 - Translation:
 - Does Universe run on randomized algorithm?

Algorithmic Education - March 2015 - Steve Ward 9

...and great thinkers *needing* CT

Mind-Body Problem ...

- Philosophers have wrestled for millennia with relation between physical & mental phenomena ... Plato, Descartes, Kant, ...
- Mind - Body dualism?

Missing: Information. Algorithm. Interpretation. State.

Rene Descartes

Cartesian Dualism

... but to us computer geeks

- Computers provide rich models:
 - Hardware vs Software
 - Information stored as transient state
 - Processes, state, identity, ... have crisp meanings
- So what's the problem???

No longer an "Interesting Problem"???

Algorithmic Education - March 2015 - Steve Ward 10

CT in University Education

1980s Adler/Sussman EE via CS

- Many use simulators to teach EE ...
 - Code as a hardware replacement
- Added wrinkle: Teach students *how to build the simulator!*
 - Code as a conceptual model
 - If you can build SPICE, you really understand electronics!

Class Resistor (LTIDevice):

```
def __init__(*args, **kwargs):
    super(Resistor, self).__in
```

Princeton COS 126

- Programming, via STEM examples
- Digital "wet lab" replacements:
 - N-body simulation
 - Fractal art
 - Simulation of guitar string
 - Random text using Markov model
 - Estimating Avogadro's number, from image data

Microsoft said Tuesday the company would comply with a preliminary ruling by Federal District Court Judge Ronald H. Winterkorn. Microsoft said Tuesday the court will find that the company is not violating the Internet. "We will continue to listen to our customers and we are not taking advantage of Windows features with our Compatibility Logo on its packaging and software."

Algorithmic Education - March 2015 - Steve Ward 11

Programming

- Kids languages, eg Scratch (ages 8-18)
- Game design environments
- "Hour of code", etc

COMPUTER SCIENCE

An enrichment and extension programme for primary-aged children

Games

- Build intuition, CT skills
- Creative playpen!

CT in K-12

AgentCubes Creativity

MIT App Inventor

CT Models & resources

- Computer Science Unplugged: CT without computers!
- Resources for K-12 teachers

Algorithmic Education - March 2015 - Steve Ward 12

We've all seen simulation games...

- "Sims": primitive models of humans
 - Simulated hunger, love, lust, anger
 - Simple, but evolved only for a few decades
- Imagine **more highly evolved sims** ...
 - Sims reverse engineer the game code?
 - Speculate about their own implementation?
 - Hack their programmed universe?
- *Reflection* threshold: awareness of own code

SimUniverses

- Our universe is a simulation
- What's the point of it?
- Infinite hierarchy of universes?
- **Big Bang**: time of last reboot?
- **God**: sysop in some higher universe?
 - 15-year-old kid playing video game?
- Prayers as bug reports, feature requests...

He thinks we're all SIMS???

```
> uptime
This universe has been running for 13.7B years.
```

This guy is **CRAZY!**

That fuzzy boundary ...

... between Profound & Crazy:

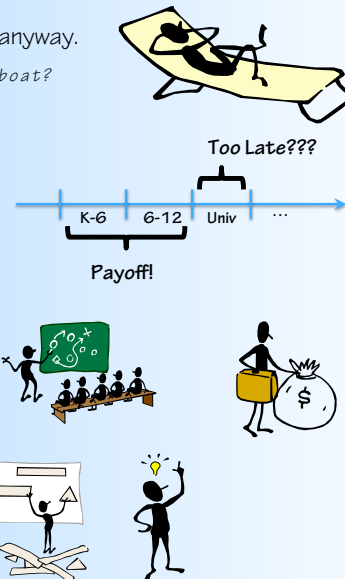

Creative Thinking:
exploring *both* sides of this boundary!

Algorithms - Computational Thinking -
Essential tool for doing so!

So, what do we do???

- **Nothing.**
 - Computational Thinking is taking over anyway.
 - *The Leading Edge*: Will **our** kids miss the boat?
- **College courses using CS for xyz**
 - Spread the application of Computer Thinking to other disciplines...
 - *Teach CT to next Teachers!*
 - *Generational Time Constant*
- **Re-educate current HS teachers**
 - Circumvent GTC ...
 - Will they all go to Google?
- **Develop tools, languages, ideas**
 - "Fuel the fire!"

Computation in Education
